

As an alternative to our self build packages. We can also supply turnkey drive away vehicles built to your individual specification. If you would like to discuss a project please feel free to contact us. We would also encourage potential customers to make an appointment to visit our workshops to view our demo car and any ongoing projects in various build stages.

Please visit our website for product pictures and more detailed descriptions - [www.flatlandsengineering.co.uk](http://www.flatlandsengineering.co.uk)

## Traditional Dune Buggy Kits

At last everything you need to build a top quality Dune Buggy all under one roof. Utilising the original Manx body shell which is considered to be the best looking body style ever produced, with modern laminating techniques and up to date materials, the quality and integrity of these shells has never been better. All our kits are supplied with the body pre-drilled to suit the individual parts supplied with your chosen kit, add to this our unrivalled quality of chassis preparation work and practical build experience, you can be sure of the best help and advice with every step you take building your dream Dune Buggy.
